catalogue

Held conversation classes with students and advised administration on
English language curriculum

PROJECTS

Greatreads

Current

Single-page web app inspired by Goodreads with a React frontend and
RESTful, Ruby on Rails backend

Allows user to create, edit, and delete bookshelves and reviews, as well as
assign books to specific bookshelves, through backend ActiveRecord
associations

Utilizes React lifecycle methods and Redux architecture to organize frontend
data and improve efficiency by providing only necessary information to state

Leverages HTML5 and CSS3 Flexbox to replicate Goodreads' clean, polished
interface

Tetris

Current

Console game implemented with JavaScript and Canvas

Creates a coordinate system through array manipulation to allow user to
move/rotate pieces within boundaries and clear rows to earn points

Utilizes JavaScript's localStorage property to record high score and sound
preferences

Renders polished images and animation through use of HTML5's Canvas
element

Domani

Jan 2018

JavaScript DOM manipulation library inspired by JQuery

Traverses, selects, and creates DOM elements

Creates node collections with custom methods using HTML5

Simplifies and processes asynchronous HTML requests

SKILLS

COMPUTER PROGRAMMING: JavaScript, Ruby, Rails, React.js, Redux, jQuery,
SQL, HTML5, CSS3, Git
